- Washington University in St. Louis Psychological & Brain Sciences
- Wayne State University (Psychology)
- West Virginia University (Psychology)
- William James College
- Yeshiva University/ Ferkauf Graduate School of Psychology, PsyD Clinical Psychology, Older Adult Program

Membership Information

Two types of membership:

Full members & Associate Members

Full CoPGTP members:

Training entities with at least one geropsychologist engaged actively in training. Members offer didactic and/or experiential training in geropsychology. Members are programs rather than individuals. However, training programs may consist of one geropsychologist supervising training in one or more settings. A “program” consisting of one individual may join as a full member of the council if the individual is a professional geropsychologist who provides didactic and/or experiential geropsychological training as a core part of their work that assists trainees in meeting one or more of the Pikes Peak competency areas. Alternatively, an individual may join as an associate member if these conditions are not met.

Associate Members:

Training entities, including both programs and individual trainers, that show significant interest and substantive involvement in geropsychology training even though the training entity does not meet criteria for full membership. Associate members do not have voting privileges.

We welcome applications from international programs, especially programs whose training is consistent with the Pikes Peak Model.

**Membership Annual Fees
(January – December cycle):**
Members – \$200
Associate Members – \$100

**Council of Professional
Geropsychology Training Programs**

OUR MISSION:

The Council of Professional Geropsychology Training Programs seeks to assist and recognize academic institutions, internship and fellowship programs, and continuing education providers dedicated to the principles and practice of professional geropsychology

Membership Benefits

About Us

The Council of Professional Geropsychology Training Programs (CoPGTP, pronounced COG-TIP) is an organization of programs providing training at the competence level and beyond.

CoPGTP grew out of the June, 2006, meeting that produced the Pikes Peak model.

CoPGTP is committed to the promotion of excellence in training in professional geropsychology and to supporting the development of high-quality training programs in professional geropsychology at the graduate school, internship, postdoctoral fellowship, and post-licensure levels of training

Benefits for Training Programs

- Consultation and networking with other geropsychologists providing training
- Venue for sharing training-related ideas, strategies, and questions via an active listserv
- Public acknowledgement as a recognized geropsychology training program. Interested parties can learn more about your program through the CoPGTP website
- Ability to apply for annual awards in research/program evaluation and innovative training
- Access to training competency documents and training models as they develop
- Communicating via Biannual "Town Hall Meetings"
- Sharing of opportunities for students and trainees
- Invitation to an annual meeting with educational and networking opportunities (held at APA or GSA)

Benefits for Trainees

- Learn about geropsychology doctoral, internship, and post-doctoral programs through the CoPGTP website
- Access geropsychology training resources via an active listserv and website repository
- Network with professional geropsychologists across training programs and professional settings
- Advocate for the field of geropsychology and serve as a student representative
